XII  
84.8
- **HIGH SCHOOL CHILHKI AMBA, AURANGABAD** 2019  
X  
85.6

## Projects

- **To Do API**
  - A restful API to add, update, delete to do work lists & is integrable with any frontend technologies.
  - Technology - Express, Node Js, MySQL
- **Registration form**
  - It is a JSP form by which we can get user's information and put it into database.
  - I used JSP, jdbc, servlet (part of advance java) in this.
- **PYQ getter**
  - By this project any body in college can access previous year question paper by putting year, branch, semester, term . **I used here node, express, mysql, postman for testing**
- **RealTime chat app**
  - > it's a real time chat application in which users can chat to each other without refreshing page.
  - > I have used here is, HTML, node, express, socket. io(for full duplex communication)
